To whom it may concern;

LETTER OF RECOMMENDATION

James Garrett was an employee of our firm from June 2003 till February 2006. He was 16 when he started with us and was assigned to our Digital Photographic department as a technician setting up digital files for photographic printing. This involved color management skills and sizing images. In addition a good amount of his time was spent taking care of our companies 16 computers.

Shortly after being employed we discovered his talents for building computers, so we assigned him to build our 12 computer digital print order stations.

James was an efficient and dedicated employee with much better than average communication skills. His work performance was error free, on time and well presented.

We considered James to be very mature for his age, and willing to work outside his assigned area as needed. Multi-tasking was easy for him and he set an example for many of those who he worked with. In the time he was with us, he was able to operate all of our photographic labs equipment, and maintain most of it as well.

On a personal note, James was good for our company, enjoyable to work with, and it was fun assigning him to different tasks, and watching him work through new challenges.

Please feel free to get in touch with me as it may be related to this recommendation.

Yours truly,

Brian B. Ainsworth
